Commentary

To achieve the Fund's investment objectives, the manager invests in high quality Canadian corporate bonds and government bonds issued in Canadian or U.S. dollars. The average term to maturity of the portfolio is managed within strict guidelines, typically between seven and twelve years. In addition to the standard investment restrictions imposed by securities legislation, the value of any one investment at month-end must not exceed 15% of the Fund's net assets at market value. This does not apply to government or government-guaranteed debt instruments.

Asset mix of the underlying fund As at June 30, 2010

Characteristics of the underlying fund As at June 30, 2010
