Units of the underlying fund	100.32%
	100.00%

## Commentary

The manager favours an innovative investment approach that capitalizes on Fidelity's fundamental research by combining qualitative stock selection with quantitative risk control. The available investment universe is comprised of stocks rated attractive by our analysts in North America, Japan, the United Kingdom, Europe, excluding U.K., and Pacific excluding Japan. The discipline uses a quantitative model to match the regional weights of the portfolio to the index. This approach diversifies specific risk, reduces tracking error and factor risk, and controls transaction costs.

## Asset mix of the underlying fund

As at December 31, 2011
